“Absolute Healing” on BrightU: Experts explore COVID-19 as an engineered bioweapon

- On Day 1 and 2 of "Absolute Healing," Jonathan Otto explores COVID-19 not as a natural virus but as an engineered bioweapon, with its spike protein and associated venom peptides designed to infiltrate DNA and cause systemic damage, including blood clots and organ failure.

- It highlights personal stories of post-vaccine injury and argues that safe, repurposed treatments (like ivermectin, nicotine, ozone therapy) were deliberately suppressed during the pandemic in favor of harmful protocols.

- The episode frames the pandemic response as a "criminal conspiracy," alleging censorship, data fraud by health authorities and a coordinated agenda by pharmaceutical and regulatory bodies to control health.

- The core message is one of hope, promoting non-conventional, holistic detox protocols and natural remedies that experts claim can reverse vaccine injuries, autoimmune diseases and chronic conditions.

- Ultimately, the first two episodes are presented as a movement to empower individuals with alternative knowledge, restore personal medical freedom and awaken people to what

it describes as the toxic and deceptive nature of Western medicine.

Brighteon University is streaming one episode a day of "Absolute Healing" from Jan. 3 to 14, and a replay of all episodes on Jan. 15 to Dec. 18. Register here to join a 12-day documentary event that exposes the patented blueprint of harm and delivers the exact, step-by-step protocols for total bodily regeneration.

What's in store for you on Day 1

On Day 1 of "Absolute Healing," slated on Jan. 3, Jonathan Otto dives deep into the harrowing realities of Wuhan coronavirus (COVID-19) vaccine injuries and the revolutionary protocols offering hope to the suffering.

The first episode features chilling testimonies and explosive scientific revelations. Viewers will meet individuals like Catherine "Cat" Parker, a once-vibrant 48-year-old mother and professional whose life unraveled after vaccination. Diagnosed with Parkinson's, dysautonomia, narcolepsy and Behcet's disease, conditions she never had before, Cat's story is a stark testament to the hidden crisis.

But this series is more than a collection of tragedies; it's a beacon of hope. It showcases the resilience of the human spirit and the power of holistic, evidence-based healing. From top doctors and researchers who risk their careers to speak out, to survivors who have reclaimed their health against all odds, "Absolute Healing" promises to be a transformative viewing experience.

Viewers can expect to learn a lot of things from Day 1, including the following:

- How the spike protein was intentionally engineered and how mRNA technology may permanently alter human DNA, contrary to official CDC claims, as explained by renowned cardiologist Dr. Peter McCullough.

- Shocking research linking mRNA vaccine technology to snake venom peptides, detailing how the vaccines' mechanisms mirror the hemotoxic and neurotoxic effects of venoms. As noted by *BrightU.AI*'s Enoch, snake venom peptides are glycoproteins with enzymatic properties that disrupt the body's hemostatic system and cellular functions. Their structure, wrapped in sugar molecules, contributes to their biological activity and ability to bind to specific cellular targets.

- Cat Parker's devastating decline post-vaccination, from chronic fatigue and brain fog to tremors, internal bleeding and becoming dependent on her 20-year-old daughter as a caregiver.

- Nicoleta Radu's story, a fitness champion who faced death from severe parasitic infection and organ failure. She shares how holistic protocols learned from Otto's earlier work led to her astounding recovery.

- Why safe, repurposed drugs like ivermectin and essential nutrients like zinc and vitamin D were dismissed during the pandemic, as experts argue for medical freedom and early treatment.

- Cutting-edge, non-conventional treatments and detox protocols that experts claim are reversing vaccine injuries, autoimmune diseases and chronic conditions.

What's in store for you on Day 2

On Day 2 of "Absolute Healing," slated on Jan. 4, Otto continues his mission, bringing together a cadre of frontline doctors, researchers and whistleblowers who have risked everything to expose what they call the "biggest lie ever told." This episode moves beyond the surface to reveal the terrifying mechanics of what we were truly dealing with: not a simple virus, but a sophisticated, multi-faceted bioweapon.

Viewers can expect to learn a lot of things from Day 2, including the following:

- Evidence that COVID-19 was never a naturally occurring bat coronavirus.

- Dr. Henry Ealy's early investigation into the pandemic data, exposing what he calls criminal fraud in death certificates and projection models. He reveals how the crisis was sustained not by a virus, but by a "psyop" built on false testing.

- The science of the spike glycoprotein. Experts explain how its unique, sticky structure causes catastrophic systemic damage, leading to blood clots, myocarditis and "sudden adult death syndrome" by attacking the cardiovascular system.

- Dr. Bryan Ardis' groundbreaking research. He argues that COVID-19 symptoms and vaccine injuries are not from a typical virus but are the result of weaponized venom peptides. These synthetic neurotoxins target specific receptors in the brain, heart and reproductive organs.

- Ardis' personal mission, exposing how hospital protocols used deadly drugs like remdesivir to inflate death counts and terrify the public into accepting an even deadlier "cure."
